a collection of all of vavgilov s works on the origin and geography of cultivated plant species

this book consists of the proceedings of a symposium organized by the accademia nazionale dei lincei rome the proceedings are unusual in that it is a rare event to see archaeologists and geneticists coming together to discuss the connection between historical facts and biological phenomena the aim of the symposium was to discuss the origin of some important cultivated plants wheat maize barley oat legumes and fruit trees not only in relation to genetical mechanisms but also as a complex of historical facts recognizable through archaeological research this international meeting based on interdisciplinary concepts met with a prompt and positive reaction from all those specialists invited to attend the book itself is an unparalleled contribution to the interdisciplinary knowledge on the origin of crop plants and agriculture

origins of agriculture and plant domestication cradles of agriculture and centres of diversity species with a not identified centre

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

in this 1948 book dr bell gives an account of all cultivated farm plants in britain at the time in the first chapters he deals with general matters then in the main part of the book he describes individually the different crop plants and their place in british agriculture

area of origin is included for each species

concise account of the transformation of wild species into cultivated plants

cultivated plants primarily as food sources is a component of encyclopedia of food and agricultural sciences engineering and technology resources in the global encyclopedia of life support systems eolss which is an integrated compendium of twenty one encyclopedias global food demand is forecast to double and possible triple by the year 2050 when more than 10 billion people will need to be fed worldwide to ensure adequate nutrition for this growing population food production must be expanded faster than the population following a longer introduction chapter with some information on the history of crop production the land used for agriculture the cropping systems and the future trends comes the knowledge in depth the grain and cereal the edible bean plants the vegetables and plants for edible starch oil sugar and beverage production the fruits and nuts the fiber forage and industrial crops each subject contains glossary and bibliography for better and deeper understanding at each important plant the history the production technology the importance of the crop in nutrition of growing population the feeding value some short case stories and the future trends

are discussed when considering plant foods in relation to human health it should be remembered that plant foods may also have health value in addition to their nutritional value it would seem possible to modify the composition of plant foods as to improve human health in developing countries poverty leads to food shortage and under nutrition and many populations survive largely on plant based diets in industrialized countries relative affluence leads to over consumption of food and especially to over consumption of animal foods at the expense of plant foods these two volumes cultivated plants primarily as food sources help to get more detailed knowledge to overcome the mentioned problem of the world these volumes are aimed at the following five major target audiences university and college students educators professional practitioners research personnel and policy analysts managers and decision makers ngos and gos

this book presents information on cultivated plants located within 12 different regions throughout the world the content introduces cultural evolution and species richness in cultivated plants considering domestication assessments which make it possible to obtain a deeper insight into the diversity of these plants cultivated plants are evolutionary connected to man human action for nature and culture is necessary to secure the basis for future existence of humanity cultivated plants are included in this compilation plants are grown for food food additives fodder medicine fiber seasoning or as green manure crops shade trees or hedge shrubs the large number of commodity groups characterize the number of interactions between man and plants the aim of this book is to bring together an actualized list of cultivated plants it was necessary to organize store and analyze gathered data during the exploration and collection missions as well as those resulting from the ethnobotanical archaeological and genomics studies the book presents essayistic introductions short data on areas of distribution and cultivation areas the use of the plant the history and descent of the plant and citations of common names as a part of the cultural evolution of mankind where necessary the content explores gene sources as plants for different breeding purposes including resistance quality yield improvement and weeds

excerpt from origin of cultivated plants the knowledge of the origin of cultivated plants is interesting to agriculturists to botanists and even to historians and philosophers concerned with the dawnings of civilization i went into this question of origin in a chapter in my work on geographical botany but the book has become scarce and moreover since 1855 important facts have been discovered by travellers botanists and archaeologists instead of publishing a second edition i have drawn up an entirely new and more extended work which treats of the origin of almost double the number of species belonging to the tropics and the temperate zones it includes almost all plants which are cultivated either on a large scale for economic purposes or in orchards and kitchen gardens i have always aimed at discovering the condition and the habitat of each species before it was cultivated about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page

may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

now in its second edition this in depth account reviews the origins and spread of cultivated plants in southwest asia europe and northern africa from the earliest beginnings through the classical era a new chapter is included on dye plants and the information on vegetables fruit trees and several grain crops benefits from recently acquired insight the authors examine evidence from archaeological sites and living plants to provide a modern synthesis of crop plant evolution describing the first domestication of plants where this occurred and how these species and practices spread throughout the world a chronological chart site orientation maps and a full set of references complete the volume
